## EnSuite Now Features An Enhanced Batch Translator

T U E S D A Y , A U G U S T 3 1 . 2 0 1 0

Farmington Hills, MI, United States, 08/31/2010

CCE, a leading engineering software and services provider, announces an update to its EnSuite software.

## ZWSOFT Announces the Acquisition of VX

W E D N E S D A Y , A U G U S T 2 5 . 2 0 1 0

GUANGZHOU, China, -- ZWCAD Software Co., Ltd (ZWSOFT), a leading provider of CAD platforms, is pleased to announce that it has completed its acquisition of VX Corporation, an American pioneering CAD/CAM solutions provider since 1985. The acquisition is a continuation of the China based 2D CAD solutions provider's recent rapid growth in the CAD/CAM market. Currently, ZWSOFT services over 180,000 users in 80 plus countries around the world and is aiming to become a leader in both the 2D and 3D CAD/CAM market.

## Chrysler makes Move to Siemens NX

T H U R S D A Y , J U N E 2 4 . 2 0 1 0

It has often been said to be careful of the doors you open. In recent years, I and many others have loudly discussed the huge cost of getting product data from V4 to V5. Dassault cannot imagine the problem they cause for themselves and, more importantly, for their customers, by not playing nicely *vis a vis* other product data formats.

Read about [Chrysler's engineering software shift](#).

In the 2009 Collaboration & Interoperability Market Report (free PDF available [here](#)), there were a few very notable results from our survey, regarding Dassault's attitude with respect to interoperability, such as:

- "Our impression from speaking with many users over the year is that Dassault continues to be the least cooperative of CAD vendors with respect to helping their customers successfully share their product data in STEP or other non-CATIA data formats."

and

## QuadriSpace Revolutionizes 3D Large Model Support in Documentation Software

T H U R S D A Y , S E P T E M B E R 1 0 . 2 0

I recently saw a demo of Quadrispace's technology. It does a nice job of easing the creation of tech docs from CAD files, maintaining product structure. It is well suited to smaller companies working with the likes of *Solidworks* and *AutoDesk Inventor*. About whether this announcement "revolutionizes 3D large model support"... well, download a demo version and see what you think. - David Prawel
